

NEXFRAME FILMS

DOCUMENTACION INTEGRAL DEL SISTEMA Y CODIGO FUENTE

Estado real del repositorio - 20 de junio de 2026

Arquitectura, paneles, flujos, IA, APIs, seguridad, ejecucion, dependencias y anexos de
codigo completo.

Documento interno de YANKYFILMS

1. Alcance y lectura correcta

Este documento describe el sistema tal como existe hoy en el repositorio local. Separa el comportamiento implementado del comportamiento esperado. Incluye el código fuente completo de los archivos ejecutables y de configuración centrales. No incluye node_modules, dist, backups, binarios, medios generados, capturas, PDFs previos ni valores secretos. Esas exclusiones no son código del producto o contienen datos que no deben redistribuirse.

No se ha modificado el producto para crear este documento. Las claves se mencionan solo por nombre de variable de entorno. Cualquier valor sensible queda fuera deliberadamente.

2. Resumen ejecutivo del estado actual

- Frontend monolítico React 19 + Vite 8. La mayor parte de la interfaz, enrutado y lógica de paneles vive en src/App.jsx.
- Backend Express 5 en server.js. Sirve API local, autenticación, jobs, MuAPI, documental, editor, YouTube, billing, web pública y administración.
- Persistencia principal en JSON local bajo data/nexframe-db.json, complementada por estado/localStorage en frontend.
- Gateway de generación: MuAPI. La selección y validación de modelos se alimenta de registros JSON y módulos de src/data.
- Procesos multimedia locales: FFmpeg/ffprobe para montaje y análisis; yt-dlp para descargas de YouTube cuando están disponibles.
- Pagos: Stripe opcional mediante STRIPE_SECRET_KEY. OAuth Google opcional mediante variables de entorno.
- El sistema combina integraciones reales, pipelines locales y varios paneles que todavía contienen acciones simuladas/locales. No todos los botones equivalen hoy a una producción IA remota completa.

3. Arquitectura

Navegador -> React/Vite -> /api/* -> Express -> validación/autenticación -> adaptador MuAPI, Stripe, FFmpeg/ffprobe o yt-dlp -> almacenamiento JSON y public/uploads -> respuesta/job -> polling y preview en la interfaz.

Capas

Capa	Archivo/tecnología	Responsabilidad
UI	src/App.jsx + global.css	Rutas, paneles, formularios, jobs, previews y administración
Datos UI	src/data/*	Catálogos de modelos, agentes y registro MuAPI
Cliente API	src/lib/*	Store, polling y ciclo de generación
Servidor	server.js	API, seguridad, persistencia, integraciones y multimedia
Persistencia	data/nexframe-db.json	Usuarios, sesiones lógicas, proyectos, jobs, web pública y billing
Archivos	public/uploads/*	Resultados y medios locales accesibles por la app

4. Paneles y comportamiento

Dashboard

Métricas, carrusel, accesos a estudios y proyectos recientes. Combina estado local y datos de trabajos.

Video Studio

Texto/imagen a video, modelos compatibles, carga de referencia, job MuAPI, polling, preview, descarga, borrado y restauración según resultado.

Image Studio

Texto/referencia a imagen, parámetros por esquema, generación MuAPI, galería, preview ampliado, descarga y papelera.

Sound Studio

Música, efectos, ambiente y voz según modelo seleccionado. Genera jobs y reproduce salidas cuando el proveedor devuelve audio.

Effects Studio

Carga de medio y solicitud de efectos mediante registro/modelo. Su profundidad real depende de la accion y modelo MuAPI disponible.

Lip Sync Studio

Foto/video mas audio, validacion de medios y generacion por modelo compatible.

Documentary Studio

Flujo por tema/guion, escenas, narrativa, subtítulos y render. Tiene jobs persistidos y un render local con FFmpeg; algunas etapas avanzadas siguen siendo artefactos/pipeline local, no una orquestacion remota completa de 40 minutos.

Music Video Studio

Pipeline, etapas, timeline y proyecto estructurado. Puede crear jobs por etapa; la automatizacion integral depende de modelos/remotos y no equivale aun a un editor autonomo completo.

Cinema Studio

Interfaz de generacion cinematografica basada en el motor generico y modelos registrados.

Video Editor Studio AI

Proyectos autenticados, upload de medios, probe, operaciones, agente de edicion y render FFmpeg. Es el componente mas cercano al DAFW/DAW audiovisual mencionado: timeline, media, operaciones, ajustes, revision y exportacion.

Flyer Studio

Plantillas visuales, direccion creativa, formato, referencias y generacion por MuAPI; historial filtrado por flyer.

Narrativa y Voz

Texto largo, voz/idioma/formato y generacion de audio. La salida real depende del modelo MuAPI configurado.

Analizador YouTube

Analisis basico, descarga con yt-dlp, recorte con FFmpeg, agente de ideas, exportacion PDF y envio conceptual a documental/editor.

Script & Narrative Engine

Edicion/generacion local inicial, exportacion JSON y accion v6 de analisis. No es por si solo un LLM completo si no se conecta mediante accion/proveedor.

Marketing

Recibe guion, producto, personaje, video y audio; construye plan de agentes y envia una generacion. El pack completo se representa como plan/orquestacion, no como garantia de todas las piezas terminadas en una unica llamada.

Public Website/Admin

Landing, planes, estudios, testimonios, metricas, FAQ, hero y assets administrables, con endpoints protegidos para admin.

Seguridad/Usuarios/Billing

Sesion firmada, cookie HttpOnly, password hash, RBAC, rate limit, bloqueo IP, Stripe opcional, planes y suscripciones.

Assets/Gallery/Trash/Generation Process

Vista y organizacion de jobs/resultados, estados de cola y acciones locales de descarga/borrado/restauracion.

5. IA, modelos y APIs

- MuAPI es el gateway universal principal. MUAPI_API_KEY y la URL/base correspondiente deben estar en el servidor.
- Los registros nexframe_v6_provider_registry.json, src/data/models-registry.js, src/data/muapiRegistry.js y src/data/models.js definen capacidades, modelos, esquemas y asignacion por estudio.
- El servidor limpia, normaliza, convierte alias, valida campos obligatorios, adapta payloads, sube archivos y consulta tareas remotas.

- Los jobs normalizan queued/processing/completed/failed/cancelled y la UI hace polling.
- No existe una unica IA que ejecute magicamente todos los paneles: cada salida depende de la disponibilidad real del modelo registrado, credenciales, esquema aceptado y respuesta del proveedor.
- Agentes de runtime y mapas v6 coordinan acciones de alto nivel. Parte de esas acciones devuelve estructura local o estados UI; debe distinguirse de una inferencia remota real.

6. DAFW/DAW y montaje audiovisual

El repositorio no contiene un modulo identificado literalmente como DAFW. La funcion equivalente esta repartida entre Video Editor Studio AI, los pipelines de Documentary/Music Video y las funciones FFmpeg del servidor. Su estructura actual es: proyecto -> media -> probe -> operaciones/timeline -> agente -> render -> archivo MP4. Las operaciones guardan decisiones no destructivas en JSON; el render ensambla los medios mediante FFmpeg. Documentary produce guion TXT, narracion WAV, subtítulos SRT y video MP4 local cuando las herramientas estan disponibles.

Para funcionar completamente requiere ffmpeg y ffprobe accesibles en PATH. YouTube requiere yt-dlp. El editor no es hoy un DAW multipista de audio profesional completo: es un editor audiovisual asistido con operaciones y render del lado servidor.

7. Autenticacion, seguridad y datos

- Passwords con hash y salt; sesiones firmadas; cookie HttpOnly.
- Roles user/admin y middleware requireAuth/requireAdmin.
- Helmet, CORS por allowlist, rate limiting y bloqueo temporal por IP.
- Uploads limitados por MIME/tamano mediante Multer.
- Recuperacion de contraseña con token temporal y respuesta que no confirma existencia del correo.
- Advertencia: existe un secreto fallback de desarrollo en server.js; produccion debe definir NEXFRAME_AUTH_SECRET.
- La base JSON local es valida para desarrollo/control local, pero no sustituye una base transaccional multiinstancia en produccion.

8. Variables y prerequisites

- Node.js compatible con Vite 8 y React 19.
- npm install.
- MUAPI_API_KEY y configuracion MuAPI del servidor.
- NEXFRAME_AUTH_SECRET obligatorio en produccion.
- GOOGLE_CLIENT_ID, GOOGLE_CLIENT_SECRET, GOOGLE_REDIRECT_URI y PUBLIC_APP_URL para OAuth.
- STRIPE_SECRET_KEY y configuracion Stripe para cobros reales.
- COOKIE_SECURE=true/NODE_ENV=production bajo HTTPS.
- FFmpeg/ffprobe para render y clips; yt-dlp para descarga YouTube.

9. Ejecucion

1. Ejecutar npm install.
2. Configurar variables de entorno sin copiarlas al frontend.
3. Ejecutar npm run dev:api para Express en el puerto 8787 por defecto.
4. Ejecutar npm run dev para Vite en el puerto indicado por Vite.
5. Abrir la URL local, registrar/iniciar sesion y probar cada panel con un modelo compatible.
6. Para produccion: npm run build y servir dist junto al backend configurado.

Criterio minimo del repositorio: node --check server.js, npm audit y npm run build.

10. Inventario tecnico

Componentes/funciones React detectados: 129. Endpoints Express detectados: 88. Archivos de codigo/configuracion incluidos completos: 17.

11. Estado funcional y limites reales

- Implementado y operativo con dependencias: autenticacion local, administracion web, persistencia JSON, jobs, adapter MuAPI, uploads, polling, editor/render FFmpeg, documental local, YouTube/clip, planes y Stripe opcional.
- Dependiente de configuracion externa: todos los modelos MuAPI, OAuth Google, Stripe, descargas YouTube y render multimedia.
- Parcial/representacional: algunas acciones v6, previews de biblioteca, agente de marketing, pipelines completos de videoclip/documental y ciertos botones de subpanel devuelven estructura, notificacion o job generico en vez de ejecutar una cadena IA completa extremo a extremo.
- La interfaz declara capacidades amplias, pero el criterio correcto es verificar cada modelo/accion contra la respuesta real del proveedor. Este documento no presenta como terminado lo que el codigo no ejecuta de forma demostrable.

12. Anexos - codigo fuente completo

Cada bloque siguiente reproduce el contenido actual del archivo indicado. Se excluyen secretos y artefactos no ejecutables segun el alcance explicado al inicio.

01542     "Pedro Sanchez entro en 2026 como quien entra a una sala con todas las luces encendidas y aun asi pregunta quien ha tocado el interruptor.",
01543     "Espana miraba a La Moncloa con una mezcla de cansancio, curiosidad y ese deporte nacional que nunca falla: opinar antes de que termine el titular.",
01544     "El año comenzo con presion politica, encuestas tensas y una oposicion pidiendo adelanto electoral cada vez que encontraba un microfono libre.",
01545     "Sanchez, por su parte, repetia que queria agotar la legislatura hasta 2027. Traducido al castellano de barra de cafe: de aqui no me mueve nadie, salvo que me muevan los numeros.",
01546     "En enero, el Gobierno impulso la regularizacion de cientos de miles de personas migrantes. Para unos, una medida necesaria; para otros, una decision explosiva. Y para las tertulias, combustible de alto octanaje.",
01547     "En febrero, la politica exterior volvio a ponerlo en primera linea. Su discurso contra la guerra y contra ataques considerados ilegales le dio perfil internacional, pero tambien abrio la pregunta incmoda: una cosa es decir no a la guerra y otra vivir en un continente lleno de bases, alianzas y contradicciones.",
01548     "Mientras tanto, el calendario judicial se fue cargando. El caso de Begona Gomez, esposa del presidente, siguio avanzando con acusaciones que Sanchez y su entorno rechazan, pero que politicamente pesan. Porque en politica una imputacion no siempre tumba un gobierno, pero le cambia la musica de fondo.",
01549     "Y aparecio el asunto de Jose Luis Rodriguez Zapatero y unas joyas valoradas en mas de un millon de euros. Regalos, patrimonio, explicaciones y silencios. En Espana hasta una caja fuerte puede robarle plano a un debate parlamentario.",
01550     "El problema para Sanchez no era solo cada caso por separado. Era la acumulacion. Corrupcion, promesas anticorrupcion sin desplegar por completo, ruido interno, desgaste externo y una pregunta flotando sobre todo el tablero: cuanto aguanta un gobierno cuando cada semana parece temporada final.",
01551     "El Partido Popular insistia en dimision y elecciones. Vox apretaba desde la derecha. Sus socios miraban cada votacion con calculadora. Y el PSOE intentaba sostener el relato de estabilidad mientras apagaba incendios.",
01552     "Pero Sanchez ha construido su carrera sobre sobrevivir a escenarios que otros daban por cerrados. Lo dieron por muerto politicamente en el pasado y volvio. Lo dieron por bloqueado y pacto. Lo dieron por terminado y siguio caminando.",
01553     "La pregunta de 2026 no es si Pedro Sanchez esta bajo presion. Eso ya no es noticia. La pregunta es si esta presion lo desgasta hasta romperlo o si, una vez mas, convierte el incendio en decorado.",
01554     "Porque en la politica espanola hay una regla no escrita: cuando todos anuncian el final, a veces empieza otro capitulo. Y Sanchez parece dispuesto a firmarlo con una sonrisa que no sabes si es confianza o cambio de guion."

armored silhouette clutching a glowing katana that pulses with ominous red light. The deep blues and purples of the wet cityscape set a moody,
cyberpunk atmosphere, with neon signs in vibrant pinks, blues, and oranges casting reflections on the glistening surfaces below. The mist and rain
softly blur the distant buildings and streetlights, emphasizing the isolation of the lone warrior framed against the sprawling urban expanse. As the
camera pulls back, the subtle hum of the futuristic city grows louder, immersing the viewer in a world of tension and anticipation, where danger
lurks in the glowing depths of the rain-drenched streets."

Passengers make small natural movements while the train doors are open. The camera moves forward and enters the train, transitioning smoothly into a window-seat point of view. As the doors close, the train starts moving. The view shifts fully to the window, showing the city passing by outside with gentle motion blur, buildings and trees sliding past. Sunlight reflects on the glass, faint interior reflections appear, and the ride feels calm and realistic with smooth, cinematic motion."

35292       "Scene: Submerged coral clearing, soft light filtering from above.\nCharacters: Tiny jellyfish with monocle and top hat, hosting
tea for small seahorses.\nAction: Jellyfish floats and pours tea → bubbles rise slowly; seahorses sip → tiny octopus clumsily serves cake.\nCamera:
Wide underwater → tracking floating jellyfish → macro on bubbles.\nLook & Lighting: Aqua-blue palette; subtle caustics on sand; shimmering
reflections on water surfaces.\nMotion/Physics: Water currents gently sway characters; bubbles rise naturally; floating cakes wobble lightly.\nAudio:
Bubbling water + faint harp melody; line: "Tea, my dear friends, before it drifts away.""

50724                 "The camera begins with a slow, deliberate zoom out from the figure standing on the rain-soaked rooftop, revealing the sleek,
                    armored silhouette clutching a glowing katana that pulses with ominous red light. The deep blues and purples of the wet cityscape set a moody,
                    cyberpunk atmosphere, with neon signs in vibrant pinks, blues, and oranges casting reflections on the glistening surfaces below. The mist and rain
                    softly blur the distant buildings and streetlights, emphasizing the isolation of the lone warrior framed against the sprawling urban expanse. As the
                    camera pulls back, the subtle hum of the futuristic city grows louder, immersing the viewer in a world of tension and anticipation, where danger
                    lurks in the glowing depths of the rain-drenched streets."

69817                 "A photorealistic fantasy portrait, transforming the woman in the image into an elegant high elf. Give her long, gracefully pointed ears that peek through her hair. Her skin has a subtle, ethereal glow. Replace her white blazer and necklaces with ornate, flowing elven robes made of shimmering silver fabric and intricate leaf patterns. The background is a mystical, twilight forest with glowing magical flora."
69818                 "**CRITICAL:** Maintain her exact original pose, serene smiling expression, and facial structure. Cinematic lighting, masterpiece, hyper-detailed."
